

International Scientific Seminar

Collaborative
Oncological
Gene-environment
Study

Wednesday 15 June

Venue: Lecture hall Jacob Berzelius, Karolinska Institutet

09.00-09.50 Coffee served

09.50-10.00 **Introduction**
Per Hall, Karolinska Institutet, Sweden

10.00-10.45 **From risk prediction to prevention via screening**
Anthony Howell, University of Manchester, UK

10.45-11.30 **Potential clinical utility of germline genetic markers in diagnosis and targeted chemo-prevention of prostate cancer**
Jianfeng Xu, Wake Forest University School of Medicine, US

11.30-12.45 **From genome-wide association to whole genome sequencing: are we any closer to resolving functionally important genetic variation in common disease?**
Julian C. Knight, University of Oxford, UK

12.45-13.30 LUNCH

13.30-13.45 **The iCOGS chip**
Douglas Easton, University of Cambridge, UK

13.45-14.10 **Genetic determinants of breast cancer (BCAC)**
Douglas Easton, University of Cambridge, UK

14.10-14.35 **Genetic determinants of breast and ovarian cancer (CIMBA)**
Antonis Antoniou, University of Cambridge, UK

14.35-15.00 Coffee served

15.00-15.25 **Genetic determinants of ovarian cancer (OCAC)**
Andrew Berchuck, NCI, Duke Cancer Institute

15.25-15.50 **Genetic determinants of prostate cancer (PRACTICAL)**
Rosalind Eeles, Institute of Cancer Research, London

15.50-16.10 **Closing remarks**
